

Learning Network on Health Assets

SPRING
2016

This opportunity will make a positive contribution to you and your service. Providing a Community of Practice Network to help you improve your understanding of asset based approaches for health and wellbeing in local communities.

The Network will offer - 6 Core Sessions and a web based discussion platform for participants and will provide insight and skills through:

- ✓ **Key note presentations** - Hearing about and discussing a range of concepts and evidence to support your work on health assets for wellbeing.
- ✓ **Theory of Change** - Using this method to help illustrate the impact and outcomes of your project - you will have an opportunity to set out the detail of your project using this approach, ensuring you know how to make progress, who to involve and the focus for outcomes.

Learning Network on Health Assets

SPRING
2016

- ✓ **Action Learning** - an opportunity to seek peer review and be solution focused on issues that can develop your project work in your local setting.
- ✓ **Peer Network** - An informal network to meet and share ideas and insights on asset based approaches. wellbeing and mental health.

Have this Network delivered directly to your organisation as a learning opportunity or reserve places on the March programme - either way your organisation will benefit.

Simon Rippon, Facilitator

Simon has a wealth of experience in organising and facilitating Communities of Practice and Peer Networks. He has led work on leadership development in Public Health, Mental Health and Young Peoples sectors providing support to organisations in the NHS Local Authorities and Community agencies.

He recently authored the Health Foundation report **Head, heart and hands - Asset Based Approaches for Health** and is engaged in asset based work & development with a number of sectors across England.
